

DALITE® ECO

The DALITE® ECO is a roof window designed for uninhabited roofspaces. With its integrated flashing and user-friendly installation procedure, this skylight is a perfect solution for those dark spaces to create more light at a very affordable price.

The product can be installed in all roofing materials; this includes all slates and tiles with a height profile from 0-90 mm. The flexible system allows installation in roofs with pitches above 15 degrees.

DALITE®

- Weather and UV light resistant
- Protected to prevent Fungal growth
- Removable foam gasket to facilitate installation in flat roofing material
- Two opening positions: operated at the bottom (or side) by peg stay
- Dual ventilation positions

2 YEAR GUARANTEE

Natural light is fundamental to the quality to our lives and living environments

DALITE®

Manufactured in pine from managed resources, the DALITE® centre-pivot roof window range is a high quality product, carrying a 10 year guarantee. These roof windows have a slim wood profile, which gives an excellent interior design and allows up to 10% more daylight into your room. The argon-filled pane gives an outstanding U-value of 1,1 W/m²K. The windows are equipped with specially designed ventilation to enhance your well-being.

Installation

Installation of DALITE® roof windows is based on acknowledged methods, which makes it easy and safe to install the window. You will find an easy-to-use textless installation instruction included with every roof window.

EASY INSTALLATION

EXCELLENT INSULATION

Wood and finish

The knot-free wood has a clear coat of water-based acrylic lacquer, which gives it a natural appearance.

Raw materials

Products are manufactured only from top quality raw materials and all wood has been sourced from sustainable and certified resources (PEFC).

Quality

Windows have been independently tested for energy performance, water tightness and sound reduction. All windows carry a 10 year guarantee.

Manufacturing

Production uses the latest and most innovative technologies and the factory is ISO 9001 certified.

Ventilation

All windows are equipped with a ventilation, living up to building requirements.

Pane

The argon-filled pane with toughened outer glass gives outstanding U-value of 1.1 (whole window value = 1.5). It is a 100% watertight solution, based upon installation principles that have stood the test of time.

Handle

The window is bottom operated with a high quality handle made from moulded zinc. The handle has dual opening positions which allows more ventilation.

Operation

The roof window is centre hung, which makes it easy to clean on the outside.

Flashing

Flashings ensure an easy and safe installation of your window. They are available for all types of tile and slate.

Compatible with Decra® Roof Systems

Internal and external blinds are available to fit DALITE® roof windows. They are designed to be easy to use and easy to install, there is no cutting or adjustment needed. Step-by-step instruction included. All blinds are covered by a 2 year guarantee.
